Note) • The return voltage is 20% or more of the rated voltage for AC and 2% or more for DC.

• The allowable voltage fluctuation rate is ±10% of the rated voltage value for both AC and DC.

• When the ambient temperature is 20°C ± 5°C and rated voltage is applied.

• For VXP2130, changing coils from AC to DC and vice versa is impossible, because of different core shapes. VXP2130, 2230, 2330 are possible to exchange coil from AC to DC, but impossible from DC to AC.

(Hum sound may generate because of no shading coil for DC.)
